# ABOUT US

Here at PetDreamHouse, our passion is to create a platform in the pet industry that can bring innovative products to the market in a convenient and cost-effective way.

We offer three primary services to our clients: Product Innovation (PDH Home Brand), Private Labeling (PDH Factory) and E-Distribution (PDH Marketplace UK).

PetDreamHouse Interactive Feeding System (IFS) is our home brand focused on feeding accessories. The ultimate goal is to bring innovative products that turn feeding into an interactive activity. We believe in the concept of game-like slow feeding wherein not only it is fun and exciting, but also beneficial for health.

# OUR PHILOSOPHY

The products of PetDreamHouse Interactive Feeding System are dynamic, functional and designed with the green mind. The multi-functional feeders let your four-legged family members enjoy a natural slow feeding experience and reduce the risk of bloat and other unpleasant effects of eating too fast.

All IFS products are made exclusively in the family-owned factory under ISO 9001:2015 standard, using high-quality FDA compliant materials without BPA, PVC or phthalate.

However, PDH IFS is not just about high-quality pet products. On the planet where reducing plastic pollution is critical, the IFS feeders are purposely designed with separated base and various functional components. , If you need more feeding games, buying only the accessory is not only less expensive, but also helps to save the plastic usage by up to 50%.

## PAW Slow Feeder

PAW Slow Feeder is a fun and unique feeding plate, which separates food into multiple mini-bowls to slow the eating speed down and reduce bloat risk. We believe a fun slow feeding game is better than simply “make it difficult to eat”.

### An Eye-Catching PAW

Colourful PAW shaped plates provide a large feeding area to slow the eating speed down naturally.

### Anti-Skid Rings

Four large anti-skid rings to provide higher stability than the traditional dot rubber feet design.

### One bite at a time

Two standard bowls, two slow feeding bowls, and a centre area which separate into multiple mini bowls, the PAW Slow Feeder naturally slow the eating speed down without being “annoyingly difficult”.

### Original Design Manufacturer

PAW Slow Feeder is originally designed by PetDreamHouse Ltd

### Material Safety

Human standard food-grade materials, BPA-FREE, PVC-FREE. Dishwasher safe (top rack)

### Competitive Price

PAW Slow Feeder is retailed at £9.99 in the UK

## Paw Pad

Active licking keeps the pet calm and entertained. It can also stimulate saliva production to improve digestive health. Spoil your four-legged friends with a healthy food licking game using the soft PAW Pad. It is perfect for sticky treats like yogurt, gravy, soggy biscuits or peanut butter.

### Active Licking

Smear wet food or sticky treats on the PAW Pad to encourage active licking – it's another great way of slow feeding your pets!

### Suction Cup Base

Each unit comes with three suction cup feet at the back and can also be used vertically as a distraction pad.

### Reduce anxiety

Apart from the yummy taste, licking also stimulates the release of endorphin (the "feel good" hormone) which gives a feeling of comfort and pleasure to reduce anxiety.

### Original Design Manufacturer

PAW Slow Feeder is originally designed by PetDreamHouse Ltd

### Material Safety

Human standard food-grade materials, BPA-FREE, PVC-FREE. Dishwasher safe (top rack)

### Competitive Price

PAW Pad is retailed at £2.99 in the UK

# SPIN

SPIN is a dynamic pet bowl that turns meals into fun and interactive slow feeding games. The patent-pending system encourages behaviours such as sniffing, licking, problem-solving during meals, which naturally slow the eating down and prevent choking or other potential hazards from fast eating.

## Multi-function

The functional parts can be fixed or adjusted in height to offer more variations. Or simply flip it over to create a whole new option!

## Interchangeable Parts

The rotating parts can be easily replaced with new designs. No only your money is saved from buying another complete unit, but also up to 50% plastic used are saved from making them!

## Anti-Skid Rings

Four large anti-skid rings to provide higher stability than the traditional dot rubber feet design.

## Original Design Manufacturer

SPIN Interactive Feeder is originally designed by PDH Ltd

## Material Safety

Human standard food-grade materials, BPA-FREE, PVC-FREE. Dishwasher safe (top rack)

## Competitive Price

SPIN Slow Feeder retail price starts from £14.99 in the UK
